Patient Health Parameters

Age (Years)

46

Diastolic Blood Pressure (mmHg)

80

Gender

Male

Glucose Level

Normal

Height (cm)

Smoking Habit

No

Weight (kg)

76

Alcohol Consumption

No

Systolic Blood Pressure (mmHg)

120

Physical Activity Level

Moderately Active

Cholesterol Level

Normal

Body Mass Index (BMI)

BMI Value

24.82

Normal Weight

Predict Cardiovascular Risk

Prediction Result

Estimated Risk Percentage

27.48 %

✓ Low Risk of Cardiovascular Disease

Maintain a healthy lifestyle and regular medical checkups.

Key Factors Influencing Prediction

- All major health indicators are within normal ranges.
